Poster Session 1

No.	Presenter	Title	Cat	Page
P1.01	X. Wang	A narrow band-pass filter type Wilkinson power divider for I-Q demodulator in microwave interferometer system	(IS)	51
P1.02	T. Ohta	Two-dimensional observation of plasma-treated cells using multiplex coherent anti-Stokes Raman scattering microscopy	(LT)	52
P1.03	K. Takeda	Diagnostics of AC excited atmospheric pressure Ar plasma jet with laser scattering spectroscopy	(LT)	53
P1.04	I. J. Kang	Development of a laser induced fluorescence (LIF) system on the plasma material interaction system (PLAMIS-II) device	(LT)	54
P1.05	T. Kondo	Disordering O-H vibrational structure at water surface by reactive species from plasma analyzed by vibrational sum-frequency generation spectroscopy	(LT)	55
P1.06	K. Nakayama	Stabilization of 48- and 57- μm CH_3OD lasers for plasma diagnostics	(IS)	56
P1.07	L. Giudicotti	Conceptual study of a polarimetric Thomson scattering diagnostic in ITER	(HT)	57
P1.08	H. Funaba	Data processing for real-time measurement of electron temperature and density by Thomson scattering in the long pulse plasmas on LHD	(HT)	58
P1.09	Y. Huang	Improvement in data processing of Thomson scattering diagnostic on HL-2A tokamak	(HT)	59
P1.10	K. Tanaka	Progress of microwave collective Thomson scattering in LHD	(HT)	60
P1.11	K. Tanaka	Scattering volume study in the collective Thomson scattering measurement using high power gyrotron in the LHD	(HT)	61
P1.12	M. Nishiura	Improved notch filter for microwave plasma diagnostics in 70 GHz range	(HT)	62
P1.13	Y. Ohtani	Development of HCN laser interferometer and its application to Heliotron J plasmas	(HT)	63
P1.14	Z. Y. Zou	Opto-mechanical systems design for polarimeter-interferometer on EAST	(HT)	64
P1.15	H. Sasao	Development of CO_2 laser interferometer/polarimeter system in JT-60SA	(HT)	65
P1.16	P. Shi	Optimization of the HCN interferometer on J-TEXT tokamak	(HT)	66
P1.17	Y. Kogi	Observation of electron temperature turbulence with correlation electron cyclotron emission radiometer on LHD	(HT)	67
P1.18	R. Soga	Developments of frequency comb microwave reflectometer for the interchange mode observations in LHD plasma	(HT)	68
P1.19	H. Idei	Adaptive-array technique in electron cyclotron emission diagnostics on QUEST	(HT)	69

Tuesday, 29 September 2015

Poster Session 2

No.	Presenter	Title	Cat	Page
P2.01	K. Muraoka	The first result of an optical monitoring system for optimization of thermal spray droplets	(IS)	70
P2.02	N. Bolouki	Diagnostics of nanosecond pulsed streamers using laser Thomson scattering	(LT)	71
P2.03	K. Koga	In-situ laser Raman spectroscopy of an optically trapped fine particle	(IS)	72
P2.04	N. Nafarizal	Two-dimensional transport behavior of Cu and Sn particles in plasmas observed by laser light scattering technique	(LT)	73
P2.05	D. J. Den Hartog	A flexible master oscillator for a pulse-burst laser system	(IS)	74
P2.06	F. Skiff	Model for laser induced fluorescence in perturbed plasmas	(LT)	75
P2.07	A. Nonaka	Density measurements of helium metastable atoms in an atmospheric pressure plasma using a laser spectroscopic measurement	(LT)	76
P2.08	T. S. Oh	Investigation of scatters in estimated electron temperature obtained with the Thomson scattering system in KSTAR	(HT)	77
P2.09	K. H. Kim	Verification of reliability of the look-up table method using the forward model of Thomson scattering system in KSTAR	(HT)	78
P2.10	J. H. Lee	Development of proto-type polychromator system for KSTAR Thomson scattering diagnostic	(HT)	79
P2.11	I. Yamada	Coaxial laser beam merging system for the LHD Thomson scattering system	(HT)	80
P2.12	T. Akiyama	Electron density measurement of magnetic confined plasma and high pressure plasma with a dispersion interferometer	(HT)	81
P2.13	W. M. Li	Conceptual design of dispersion interferometer basing on ratio of modulation amplitudes on EAST	(HT)	82
P2.14	T. Lan	Study of retro reflector array for the polarimeter/interferometer system on EAST Tokamak	(HT)	83
P2.15	L. Zeng	Output power stability of a HCN laser using a stepping motor for the EAST interferometer system	(HT)	84
P2.16	Y. G. Li	The first electron density fluctuation measurements via the HCOOH laser far-forward collective scattering on the HL-2A tokamak	(HT)	85
P2.17	W. Mao	Terahertz solid state source based interferometer on KTX	(HT)	86
P2.18	J. Kohagura	Development of microwave imaging interferometer system for divertor simulation experiments in GAMMA 10/PDX	(HT)	87
P2.19	H. Idei	Multiple wall-reflection effect in adaptive-array differential-phase reflectometry on QUEST	(HT)	88
P2.20	T. Tokuzawa	Application study for magnetically confined fusion plasma diagnostics using pulsed terahertz waves	(HT)	89
